The Archaeological Stable Isotope Laboratory at the Christian-Albrechts University in Kiel invites applications for a

post-doctoral position

in stable isotope analysis to begin June 1st, 2016. The duration of this limited-term, full-time post (currently 38.7 hours per week) is for three years at the TV-L 14 level. An extension is planned. The post is intended to further additional scientific qualification (e.g. Habilitation).

We are seeking a highly motivated individual to conduct research involving the analysis of stable isotopes to address issues relating to animal and human mobility, animal exploitation, and crop management in the Near East, Central Asia, and/or Northern Europe. This position also involves some teaching with a requirement of 4 LVS per fourteen week semester (approximately 3 in-class hours per week; two semesters per year).

The applicant should have previous technical experience with a Picarro Ring-Down Cavity Spectrometer for the measurement of liquids and leaf water d18O and an Isoprime for the measurement of d13C and d15N.

Requirements include a Ph.D. in anthropological archaeology or geochemistry and a record of achievement in the use of stable isotopic analysis.

The Christian-Albrechts University is an equal opportunity employer and is committed to increasing the proportion of female scientists in research and teaching, and strongly encourages female applicants. Women will be given preference in case of equal suitability, competence, and professional performance.

The University is also committed to the employment of disabled persons, and such individuals will be accorded preference if suitable.

The application deadline is May 17th, 2016. Preferred start date for this post is June 1st, 2016. Please send a cover letter, CV, a statement of research, and 2 letters of recommendation (direct from the letterwriters) via e-mail to

c.makarewicz@ufg.uni-kiel.
